

DIVYANSH KANDE

Bhopal, Madhya Pradesh, India
+91-81094-19725 • divyanshkande04@gmail.com • [GitHub](#) • [LinkedIn](#)

Final-year B.Tech (AI & ML) student with strong foundations in Data Structures & Algorithms, OOP, DBMS, and scalable backend development using Java & Spring Boot. Experienced in designing RESTful APIs, authentication systems, modular architectures, and AI-powered applications using React.js, LLM APIs, and computer vision tools. Built and maintained scalable full-stack projects with clean architecture and version control practices. National finalist, India Innovates 2026 (25,000+ teams).

TECHNICAL SKILLS

Languages	Java, Python, C++, SQL
Backend	Spring Boot, Hibernate, REST APIs, JWT Authentication, RBAC
Frontend & DB	React.js, Tailwind CSS, MySQL, Firebase
AI / ML	LLM APIs, YOLOv8, OpenCV, Tesseract OCR, Computer Vision
Cloud & Tools	Git, GitHub, Postman, AWS (EC2, S3), CI/CD Basics
Core CS	Data Structures & Algorithms, OOP, DBMS, Operating Systems, System Design

PROJECTS

Finsage — Personal Finance Platform | *Java · Spring Boot · React.js · MySQL · JWT · Firebase · OCR · LLM APIs* Jul 2025 — Present

GitHub: github.com/divyanshkande/finsage

- Designed and optimized 15+ RESTful APIs using Spring Boot with layered controller-service-repository architecture for maintainable and scalable backend development.
- Optimized MySQL queries and backend response handling, reducing average API response time by approximately 40% under concurrent simulated requests.
- Built OCR pipeline using Tesseract OCR to convert unstructured bill images into structured financial records with ~85% extraction accuracy.
- Implemented JWT authentication, RBAC authorization, and Google OAuth 2.0 login for secure multi-role access control and simplified onboarding.
- Integrated LLM APIs for AI-powered savings insights and financial recommendations; maintained modular backend with reduced feature coupling for easier service expansion.

Raahi — AI Travel Planner | *React.js · Spring Boot · LLM APIs · Leaflet.js · OpenStreetMap* Aug 2025 — Present

GitHub: github.com/divyanshkande/raahi

- Developed stateless REST APIs for itinerary generation and travel recommendation workflows using Spring Boot.
- Applied service-layer abstraction to separate AI orchestration, business logic, and API handling for improved scalability.
- Integrated LLM APIs for context-aware travel recommendations across 50+ destinations.
- Built interactive travel visualization interface using Leaflet.js and OpenStreetMap; optimized frontend rendering for smoother experience in low-bandwidth conditions.

Wildlife Detection System | *Python · YOLOv8 · OpenCV* Oct 2025 — Dec 2025

GitHub: github.com/divyanshkande/wildlife-detection

- Trained custom YOLOv8 model on 5,000+ labeled wildlife images achieving 82% mAP@0.5 across 10+ animal species.
- Optimized inference pipeline to ~45ms/frame on CPU using batching and lightweight techniques — a deliberate performance-efficiency trade-off for edge deployment without GPU dependency.
- Built real-time detection system supporting live camera feed and screen-recorded video processing.

TECHNICAL EXPERIENCE

- Solved 500+ Data Structures & Algorithms problems across LeetCode and Codeforces focused on arrays, dynamic programming, graphs, trees, and system design thinking.
- Worked on backend-focused projects involving API development, authentication systems, database optimization, and layered architecture design.
- Maintained Git-based development workflow with modular commits, branching, API testing using Postman, and logging-based troubleshooting.

ACHIEVEMENTS & CERTIFICATIONS

- Finalist — India Innovates 2026** | Top 0.01% among 25,000+ teams nationwide.
- Finalist — Hacksagon 2026, ABV-IIITM Gwalior** | National-level hackathon.
- Software Engineering Job Simulation — JPMorgan Chase & Co. (Forage)** — Backend API design and data processing tasks.

EDUCATION

Oriental Institute of Science and Technology Sep 2022 — Jun 2026

Bachelor of Technology — Computer Science & Engineering (AI & ML) • Class XII: 76% • Class X: 89%

Relevant Coursework: Data Structures & Algorithms, DBMS, Operating Systems, OOP, Software Engineering, Machine Learning
